

ISHTHIYAQ AHAMED

Aspiring AI & Software Engineering Graduate | Full Stack Developer | MERN Stack Specialist

Colombo, Sri Lanka | Ishthiyaqahamed@gmail.com

[Linkedin](#) | [Github](#) | [Portfolio](#)

PROFILE

Motivated and results-driven Software Engineering graduate with strong hands-on experience in full-stack web application development, software architecture, cloud technologies, database management, and scalable software solutions. Proficient in developing end-to-end applications using the MERN stack, with strong technical knowledge of React.js, Node.js, Express.js, JavaScript, TypeScript, MongoDB, MySQL, SQL, RESTful APIs, Firebase, AWS, Git, and GitHub. Experienced in designing and implementing responsive user interfaces, secure authentication systems, backend services, database architectures, API integrations, and cloud-based applications while following modern software engineering practices and maintainable coding standards. Hands-on experience developing real-world projects including marketplace platforms, enterprise resource planning systems, SaaS applications, automation solutions, inventory management systems, location-based applications, and route optimization features. Strong understanding of software development life cycles, object-oriented programming, database design, API architecture, version control, testing, deployment, and problem-solving.

TECHNICAL SKILLS

- Programming Languages: JavaScript, Python, Java, C, C++, SQL, HTML, CSS
- Frontend: React.js, React Native, HTML5, CSS3, Responsive Design
- Backend: Node.js, Express.js, REST APIs
- Databases: MongoDB, MySQL
- Cloud & Deployment: AWS, Google Cloud, Vercel
- Tools: Git, GitHub, Google Analytics
- Other: SEO, CMS, Database Management

EDUCATION

Bachelor of Science (Honours) in Software Engineering

University of Bedfordshire | Aug 2024 - Oct 2025

- Specialized in Web and Application Development
- Completed projects involving full-stack systems, database integration, and scalable software solutions.
- Developed an web and mobile app marketplace for homemade food entrepreneurs (React, Node, Express, Firebase)

HND in Computing

PEARSON | BCAS Campus | Feb 2020 - May 2024

- Coursework focused on software development, databases, networking, and project management.

GCE Ordinary Level

Zahira College | 2018

- 9 Subjects including Mathematics, Science, and English

FEATURED PROJECTS

APPLICATION BASED MARKETPLACE FOR HOMEMADE FOOD ENTREPRENEURS (Local Plates)

Undergraduate Individual Project | SLIIT Sri Lanka

- Developed a full-stack marketplace platform connecting homemade food entrepreneurs with customers using the MERN stack.
- Implemented core marketplace functionality including user management, food listings, ordering, and delivery management.
- Applied Dijkstra's Algorithm for delivery route optimization and shortest-path calculation.
- Designed a scalable application architecture with a focus on responsive user interfaces and user-centered design.

GEMOTIONS

Fullstack Development project - [Explore project](#)

- Developed a responsive e-commerce website for a Sri Lankan gemstone business.
- Built user-friendly product listings and business information modules for showcasing gemstones online.
- Implemented responsive frontend components and integrated backend functionality for efficient data management.
- Improved the business's digital presence through a professional, scalable, and mobile-friendly web platform.

MULTI-BRANCH PHARMACY ERP SYSTEM

Full-Stack Development Project - [Explore project](#)

- Username: admin@pharmacy.lk || Password: admin123
- Designing a multi-branch pharmacy ERP system with inventory, procurement, sales, stock transfers, reporting, and user management modules.
- Designing a batch-level inventory model supporting medicine batch numbers, expiry dates, manufacturers, and branch-specific stock quantities.
- Implementing FEFO (First-Expiry-First-Out) inventory logic to prioritize medicines based on expiry dates during sales.
- Developing procurement workflows connecting purchase orders, goods received, suppliers, and batch inventory updates.
- Designing role-based access control for administrators, branch managers, pharmacists, and cashiers.
- Developing low-stock and near-expiry alerts and branch-level reporting for inventory and sales management.
